

Emergency Plans and Alerts

Notification of an on-campus emergency is communicated on an individual or group basis by person-to-person contact. Such an emergency would be confirmed by contact with the individual reporting the threat. Depending on the nature of the threat, a determination would be made as to which segments of the community should be notified. The institution will take the actions described above without delay. The office of the president or any vice president is responsible for carrying out these actions. When appropriate, the larger community would be notified via contact with the local police. Evacuation procedures are in place for fire emergencies and would be used as appropriate in other emergencies. The Emergency Guidelines for RRC are filed in the office of the vice president for administration and with Cheltenham Township.
